

ABSTRACT OF THE DISCLOSURE

A first conductive layer is formed. An insulating layer is formed so that at least a part of the insulating layer is disposed on the first conductive layer. A second
5 conductive layer is formed so that at least a part of the second conductive layer is disposed on the insulating layer over the first conductive layer. Each of the first and second conductive layers is formed by discharging drops of a solvent containing fine particles of a conductive material. The insulating layer is formed by discharging drops of a solvent containing fine particles of an insulating material.
